State Health Alliance FOR Records Exchange

Taking Interoperability to the next level by
utilizing SHARE as a Data Utility

What is a Health Data Utility

Health Data Utilities (HDUs) are statewide entities that combine, enhance, and exchange electronic health data across care and services settings for treatment, care coordination, quality improvement, and public and community health purposes through specific, defined use cases in accordance with applicable state and federal laws protecting patient privacy.

HDUs are flexible and capable of meeting state - specific health data needs

Not for profit

Medicaid and public health use cases
